

Instructor Observation

Instructor: Quinn Briggs

Observer: Brett Amidan

Class: CSE 111 Programming with Functions

Date/Time: 5/11/23 12:45 pm

Observed areas:

Creating an environment of respect and rapport	Creates a friendly environment before class. Lots of student participation with the spiritual thought.
Establishing a culture for learning	Class seems ready to go and engaged. I'm guessing that you have encouraged that from the beginning and established it as class culture.
Communicating with Students	Set up what they are going to accomplish that day first thing. Students know what's going on that day.
Using Questioning & Discussion techniques	Worked thru the process of building a function with the students and relied on them to determine the path with leading questions.
Engaging Students in Learning	Team task to allow them to apply what was discussed.
Using Assessment in Instruction	Not sure if assessment was occurring, but my guess is that while you were walking around and helping on the team task, you were able to assess individual student progress. If not, I recommend doing something towards the end that might help with that.

Great job! Enjoyed the class. First 5 minutes spiritual thought and welcome. Next 25 minutes discussing functions and the assignment they will be doing after class. Next 30 minutes students worked on Team activity.
